2. MANAGING PLUGIN & CONTACT DETAILS

This document relates to the BrandCrock plugin for **Variant Product Price Range** and contains important information about installation and usage of the plugin. At the same time, this document serves as performance and functional specification for features available in the plugin.

If you face any issue or problems on installing or testing our plugin please contact our Support team.

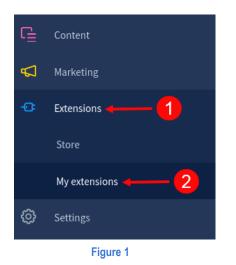

F Please don't change or modify the plugin without having any experience or understanding.

2.1 About this Plugin

Variant Product Price Range plugin is used to display the minimum and maximum prices of variant products. When searching for products, the customers are not able to get the price ranges of Variant Products. For that, the customer needs to open the product detail page, select the variant and view the price. To avoid this scenario, the price range plugin can be used to show the price range (minimum and maximum) for the variant product in the listing page as well as on the Article detail page.

3. PLUGIN INSTALLATION

The initial step is the **Installation** of the plugin. The following screenshots will explain you in detail about the installation process, **Step 1:** Login to shop backend, navigate to **Extensions I My extensions**.
